Thank you for expressing an interest in Romic by submitting a profile for evaluation. The verification process has been completed for the above profile. In accordance with CFR 40 264.12(b), this letter is to inform you that Romic has the appropriate permit(s) for and will accept the material as profiled at our fully permitted facility (EPA ID# CAD009452657).

Should at any time there be a change to the process or operation which generates the material as profiled or any profile modifications are needed, please contact our Customer Service staff so that we may revise our records to ensure that accurate information is maintained on file. With your permission, we will adjust the profile to ensure the information accurately reflects the submitted representative sample of the waste stream. Please review the attached profile carefully for any needed modifications.

Please keep a copy of this notification. The regulations under 40 CFR 264.12 require this documentation to be in the generator's records.
